

## **REMOTE OPERATION AND VIRTUAL REALITY CENTRE ROViR**

*Harri Kuusela  
(ROViR-Centre, Tampere, Finland)*

ROViR centre is a new international development centre founded in Tampere, Finland. ROViR Centre is part of the large ITER (International Thermonuclear Experimental Reactor) research project. ROViR develops and commercializes remote operation and virtual reality technologies for the scientific and industrial needs.

Responsible organisations for the ROViR are VTT, Tampere University of Technology and Lappeenranta university of Technology. ROViR is networked with Technology Centre Hermia, TEKES and leading manufacturing industry in Finland.
